Ethically developed AI support, always guided by expert human tutors

New in 2026: AI Literacy

AI is transforming the way students learn, work, and prepare for the future. That is why we're excited to introduce AI Literacy, our newest subject offering, where expert human tutors and our AI chatbot, Ask LEO, guide students through safe exploration of AI tools, critical thinking, and responsible AI use. Concepts include Foundations of AI, Ethics and Societal Impact, Media Literacy, Career and Educational Pathways, and more.

Ask LEO® - an AI chatbot

Ask LEO is an AI-powered research assistant integrated directly into the Tutor.com Classroom. Designed with a Socratic approach, Ask LEO guides students through questions and critical thinking rather than simply providing answers. Students receive instant, on-demand support across dozens of subject areas, including business, health sciences and nursing, technology, and career services. When additional support is needed, students can seamlessly connect with a live Tutor.com tutor at any time.

AI essay review

AI Essay Review provides near-instant, line-by-line feedback alongside a comprehensive summary to help students strengthen their writing. The tool delivers encouraging, constructive guidance by highlighting essay strengths, offering personalized feedback tailored to each student's work, and providing targeted suggestions for improvement.
