Money: Snacks at the Movies

Instructions: Practice using the four operations to solve word problems involving money through the following scenario.

After a long week of school, you and your 3 friends decide to go to the movies over the weekend. You put all your money together and have $40 in total to spend at the movie theatre.
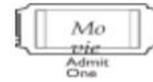

POPCORN	Cola	Candy	Pretzel	Movie Admit One
$3	$2	$1	$2	$4

1. How much will it cost for each of you to get a movie ticket?

    How much money will you and your friends have left to spend after buying the movie tickets? Answer in a complete sentence.

2. You and your friends decide to buy snacks to enjoy while watching the movies. Fill in the blanks with how many of each item you and your friends would like to buy.

    ___ Popcorn ($3 each)   ___ Soda ($2 each)
    ___ Candy bar ($1 each)   ___ Pretzel ($2 each)

    How much money will it cost to buy the snacks?

3. After buying the tickets and snacks, how much money do you and your friends have left to spend? Answer in a complete sentence.
